

## Temple Kol Ami Emanu-El Early Childhood Center

Plantation, Florida

The Early Childhood Educational Center was phase one of a two-year expansion plan for the temple. Our firm designed the education building in a contemporary style of architecture to match the existing buildings on the campus. Temple Kol Ami has presently opened the facility for the children enrolled in the summer program. Phase two has now begun which will include a 7,000 square foot partially roofed playground, parking expansion and landscaping.
