

CAC- Florida Medical Centers, Inc

Miami, Florida

Pasquale Kuritzky provided design through construction contract administration services for CAC-Florida. The interior of the existing 12,000 SF building was completely demolished and both floors will be renovated, including the addition of office spaces planned for the ground floor. Exterior modifications include window replacement and relocation of exterior doors as well as a new patient drop-off area.

The design by Pasquale Kuritzky Architecture will include main and secondary reception and waiting areas, Wellness & Community Room, pain modalities area, doctors' offices, exam rooms, triage areas, labs, x-ray area, medical records areas, administration/referral department and nurses station areas, restrooms, lounges and storage.

Construction began in August 2009 with completion projected for spring 2010
